

Tyto-PhishShield Brand Style Guide

1. Brand Identity

Mission

Help organizations build human resilience against phishing attacks through realistic simulations, instant feedback, and engaging security awareness training.

Make employees a part of the firewall

Product Personality

- Trustworthy
- Intelligent
- Protective
- Motivating
- Modern
- Professional
- Approachable

Voice & Tone

- Clear
- Helpful
- Encouraging
- Security focused
- Professional without fearmongering

UX Philosophy

The platform should:

- Encourage learning rather than punish mistakes.
- Make cybersecurity approachable.
- Provide teachable moments
- Reward positive security behaviour through gamification.

2. Logo Direction

Primary Logo Concept

Current primary branding uses:

- Owl mascot
- Tyto wordmark
- Dark-mode optimized lockup

Minimum Size Rule

- Standalone owl mark (16 x 16px)
- Full logo lockup (Owl symbol at least 24 x 24px)

Clear-space Rule

- The minimum clear space around the logo should be equal to at least half the width of the owl symbol.

Forbidden Treatments

The logo must not be:

- Stretched, compressed or distorted.
- Rotated or skewed.
- Cropped so that important elements are removed.
- Recoloured using colours outside the approved palette.
- Given drop shadows or glow effects.
- Given additional outlines or borders.
- Placed on a background with insufficient contrast.

Logo Variants

Full logo lockup for light and dark sidebar backgrounds

Icon-only compact variant for collapsed sidebar and small interface areas

3. Iconography

The current interface uses custom inline SVG icons. (we used a combination of a Figma tools and AI-assisted generation was used to help create the current icons)

We plan to migrate to Lucide icons after Demo 2 to establish a consistent icon library, sizing system and stroke style.

Icon sizes

Usage	Recommended size
Small badge or compact control	6px
Button or form control	10px
Navigation item	16px
Default standalone icon	18–24px

Stroke Width

A default strokeWidth of 2 – 2.5 is used.

4. Colour System

Brand and semantic colours

Token	HEX	RGB	Purpose
--color-primary	#2563EB	rgb(37, 99, 235)	Primary actions, buttons, links, selected states and focus indicators
--color-primary-hover	#1D4ED8	rgb(29, 78, 216)	Hover and pressed states for primary actions
--color-primary-light	#EFF6FF	rgb(239, 246, 255)	Light informational backgrounds and selected states
--color-primary-mid	#BFDDBFE	rgb(191, 219, 254)	Stronger blue highlights and accent borders
--color-success	#22C55E	rgb(34, 197, 94)	Successful actions, completed states and positive indicators
--color-success-light	#F0FDF4	rgb(240, 253, 244)	Success message and badge backgrounds
--color-success-border	#BBF7D0	rgb(187, 247, 208)	Success borders and dividers
--color-warning	#F59E0B	rgb(245, 158, 11)	Warning states, suspicious activity and caution indicators
--color-warning-light	#FFFBEF	rgb(255, 251, 235)	Warning message and badge backgrounds
--color-warning-border	#FDE68A	rgb(253, 230, 138)	Warning borders and dividers
--color-danger	#EF4444	rgb(239, 68, 68)	Errors, threats and destructive actions
--color-danger-light	#FEE2E2	rgb(254, 242, 242)	Error message and danger badge backgrounds
--color-danger-border	#FECACA	rgb(254, 202, 202)	Error and danger borders
--color-navy	#0F172A	rgb(15, 23, 42)	Sidebar background, dark structural elements and primary light-theme text

--color-navy-mid	#1E3A5F	rgb(30, 58, 95)	Secondary navy accents and dark decorative elements
-------------------------	---------	-----------------	---

Light Theme colours

Token	HEX	RGB	Purpose
--bg-page	#F8FAFC	rgb(248, 250, 252)	Main page background
--bg-card	#F1F5F9	rgb(241, 245, 249)	Cards, panels and top navigation
--bg-sidebar	#0F172A	rgb(15, 23, 42)	Sidebar background
--bg-topbar	#F1F5F9	rgb(241, 245, 249)	Topbar background
--bg-input	FFFFFF	rgb(255, 255, 255)	Input and form-control backgrounds
--bg-hover	#E2E8F0	rgb(226, 232, 240)	Neutral hover states
--border	#CBD5E1	rgb(203, 213, 225)	Standard borders and dividers
--border-strong	#CBD5E1	rgb(203, 213, 225)	More prominent component borders
--border-focus	#2563EB	rgb(37, 99, 235)	Focused form controls and focus rings
--text-primary	#0F172A	rgb(15, 23, 42)	Headings and standard body text
--text-secondary	#64748B	rgb(100, 116, 139)	Supporting text and metadata
--text-muted	#94A3B8	rgb(148, 163, 184)	Placeholders, disabled text and non-essential information
--text-on-dark	FFFFFF	rgb(255, 255, 255)	Text displayed on navy and other dark backgrounds
--sidebar-text-active	FFFFFF	rgb(255, 255, 255)	Active sidebar navigation text

Dark Theme colours

Token	HEX	RGB	Purpose
--bg-page	#0D1117	rgb(13, 17, 23)	Main dark-theme page background
--bg-card	#161B22	rgb(22, 27, 34)	Cards, panels and top navigation
--bg-sidebar	#0D1117	rgb(13, 17, 23)	Dark-theme sidebar background
--bg-topbar	#161B22	rgb(22, 27, 34)	Dark-theme topbar background
--bg-input	#21262D	rgb(33, 38, 45)	Dark-theme input backgrounds
--bg-hover	#1C2128	rgb(28, 33, 40)	Dark-theme hover states
--border	#30363D	rgb(48, 54, 61)	Standard dark-theme borders
--border-strong	#3B4553	rgb(59, 69, 83)	Strong dark-theme borders
--border-focus	#2563EB	rgb(37, 99, 235)	Focused controls and focus rings
--text-primary	#F0F6FC	rgb(240, 246, 252)	Main headings and body text
--text-secondary	#8B949E	rgb(139, 148, 158)	Supporting text and metadata
--text-muted	#6E7681	rgb(110, 118, 129)	Disabled and non-essential information
--sidebar-text-active	#FFFFFF	rgb(255, 255, 255)	Active sidebar navigation text

WCAG 2.2 Contrast Ratios

After demo 2 we will address the failing pairing ratios.

Light Theme pairings

Foreground	Background	Ratio	Result
Primary text #0F172A	Page #F8FAFC	17.06:1	AAA
Primary text #0F172A	Card #F1F5F9	16.30:1	AAA
Secondary text #64748B	Page #F8FAFC	4.55:1	AA
Secondary text #64748B	Card #F1F5F9	4.34:1	Fails AA for normal text

Muted text #94A3B8	Page #F8FAFC	2.45:1	Fails AA
White #FFFFFF	Primary blue #2563EB	5.17:1	AA
White #FFFFFF	Primary hover #1D4ED8	6.70:1	AA
Primary blue #2563EB	Light blue #EFF6FF	4.75:1	AA
White #FFFFFF	Navy #0F172A	17.85:1	AAA

Dark Theme pairings

Foreground	Background	Ratio	Result
Primary text #F0F6FC	Page #0D1117	17.39:1	AAA
Primary text #F0F6FC	Card #161B22	15.89:1	AAA
Secondary text #8B949E	Page #0D1117	6.15:1	AA
Secondary text #8B949E	Card #161B22	5.62:1	AA
Muted text #6E7681	Page #0D1117	4.12:1	Fails AA for normal text
Primary blue #2563EB	Page #0D1117	3.66:1	Large text and graphical elements only
Primary blue #2563EB	Card #161B22	3.35:1	Large text and graphical elements only

5. Typography

Font Family

- font-family: "Inter", system-ui, -apple-system, sans-serif;

Responsive Typography Scale

Use	Size
Hero / Display	32–50px
H1	28–32px
H2	22–24px
H3	18–20px
Dashboard Title	15–17px
Dashboard Body	12–13px
Body	14–16px
Caption	11–12px
Micro Labels	10–11px

Line Heights

We use 1.5 as default.

Font Weights

- 400 Regular
- 500 Medium
- 600 Semibold
- 700 Bold
- 800 Extra Bold

Source: Inter is loaded from Google Fonts. If it cannot be loaded, the browser uses the device's system UI font. Then after that sans-serif font.

Licence: Inter is distributed under the SIL Open Font License 1.1. This allows for personal and commercial use.

6. Spacing System

Use an 8px spacing grid. (4 and 12px also allowed)

Core Scale

- 4
- 8
- 12
- 16

- 20
- 24
- 32
- 40
- 48

7. Layout

Desktop-first application.

Uses an 8px spacing system throughout the interface.

Content is displayed using flexible layouts (Flexbox) with responsive containers where appropriate.

The application is designed for modern desktop browsers with wide-screen layouts.

Components resize naturally to different desktop window sizes, but no dedicated mobile layout is currently provided/Inecessary.

8. Border Radius

Token	Value
sm	6px
md	8px
lg	12px
xl	16px
full	9999px

Usage

- sm → small controls
- md → buttons/inputs
- lg → cards
- xl → modals/highlight containers
- full → pills/badges/avatar circles

9. UI Components

Buttons

Variants:

- Primary
- Secondary
- Danger
- Ghost
- Outline

States:

- Hover
- Active
- Disabled
- Loading

Inputs

- Text input
- Password input
- Select dropdown
- Date input
- Textarea

Navigation

- Sidebar navigation
- Topbar
- Breadcrumbs
- Theme toggle

Feedback Components

- Toast notifications
- XP animations
- Loading spinners
- Status badges

Data Components

- Dashboard metric cards
- Campaign tables
- Analytics charts
- Leaderboards
- User lists

Modal Components

- Overlay blur
- Escape key close
- Animated entry

10. Accessibility

The platform targets WCAG AA compliance.

Note: For demo 2 the frontend does not meet all the requirements yet. We will make it a priority to address this before demo 3.

Requirements

- Proper colour contrast
- Keyboard navigation
- Visible focus states
- Readable typography
- Semantic button usage
- ARIA labels where necessary
- Responsive scaling

Focus System

Use visible blue focus rings:

- Accent Blue (#2563EB)
- Soft glow outline

11. Motion System

Animations should remain subtle and fast.

Transition Timing

Interaction	Duration
Hover	150ms
Sidebar collapse	200ms
Modal entry	150–250ms
Page transitions	300–400ms
Spinner rotation	Continuous

Motion Types

- Hover elevation.
- Fade ins.
- XP gain overlays.
- Toast animations.
- Modal scale/fade entry.
- Card hover movement.

We should avoid excessive animation.

12. Dashboard Layout

Core Layout Structure

- Persistent sidebar (used for navigation and is collapsable).
- Responsive dashboard grid.
- Scrollable content region.

Dashboard Principles

- Information density
- Fast scanning
- Compact analytics
- Role-based navigation
- Modular reusable cards

Navigation Structure

Main

- Dashboard
- Campaigns
- Users
- Training
- Leaderboard

It depends on the role.

Analytics

- Analytics
- Reports

System

- Settings

Role-Based Visibility

Navigation changes dynamically based on:

- Admin
- Analyst
- User roles

13. Gamification System

Gamification Features

- XP points
- Badges
- Leaderboards
- Security score
- Training progression

Goal

Encourage positive security behaviour through rewards and competition.

Changelog from demo 1 to demo 2

- Updated Typography section to align with the updated fontFamily, added line height and added source and license we use on the website.
- Added a dedicated icon section, we did not have one before.
- Added rules and forbidden treatments to Logo section.
- Updated Colour section so that tables also have rgb values since it is mentioned in the demo 2 instructions.
- Also added WCAG 2.2 ratios section under Colour section
- Added dedicated Layout section.
- Updated colour section since some colours changed and we did not previously include the light theme and dark theme colours in this document.
- Fixed mistake in border radius section since sm, md and lg had incorrect values in the table.
